

# Women's Health Paper Outline

Scope: post-partum follow up

- Introduction: [Pedro B Carneiro](#) Pedro to do lit review and first draft with Jayson
  - Women's Health data quality
  - Women's health measures-- post-partum
  - Literature Review - who will do?
- 1) [Raymonde Uy](#) with Jayson Challenges in Women's Health Data
  - Lack of equity in support for women's health content
  - EHR data is already bad
    - Support for extraction variable
    - Across sites standardization is worse
- 2) Building a measure from HCD [Raymonde Uy](#)
  - Summary of HCD approach from NACHC
  - Partners
  - Components of the primary outcomes analysis of the data available
- 3) Data from health centers on post-partum GDM/Contraception/pregnancy status [Pedro B Carneiro](#) Jayson to do first draft
- Discussion: [Julia Skapik](#) with [Pedro B Carneiro](#)
  - Data quality is terrible
    - In part standardized support would help
    - Lack of transitions of care data
  - Need for pregnancy episode
    - Pregnancy status
    - LMP
    - EDD
    - Delivery date
    - Pregnancy outcome
  - Support for peri- and post-partum transitions of care
    - Inpatient to outpatient data transmission
    - Handoff to primary care
    - Linked maternal and infant records
